

Turn dreaming into doing

Your business requires a device that works as hard as you and your team. Surface Surface Book delivers the power your business needs to help everyone create, collaborate, and do amazing things.

Work however you like

Surface Book features an innovative design that's as flexible as you are. Fold back the screen to use as a tablet. Detach it altogether to use touch and Surface Pen in Clipboard mode. And when you're ready for a more traditional laptop, clip it back on to use the best-in-class keyboard.

Make your mark

Using Surface Pen is a precise, natural way to sketch, write, and share your ideas. Plus taking notes in OneNote or searching the web with Cortana¹ is just a click away.

Do more than ever

Surface runs Windows 10, the most powerful and familiar version of Windows yet.

"It can be anything I need it to be, from a note-taking tablet to a slick presentation tool."

- Forrest Hobbs, Senior VP, Sales & Business Development
